

Windmill Windbag

“We’re not doing wind. We’re going back to fossil fuel.”

Donald J. Trump

I have seen the future and it’s in Iowa where
more than 6,000 windmills punctuate the landscape
providing 65% of the state’s electricity generation.

When the wind blows you can hear their gentle humming
drowning out the demented ravings of a howling blowhard
who sees the future in the pit of a coal mine.
