

BC

Do you remember when...

BC meant something other than Before Covid?

We could talk about politics with friends and neighbors...

without raising our voices or losing our tempers?

Polarize was something we expected our sunglasses to do...

not our political leaders?

Project 2025 was a secret plan Donald Trump claimed to know nothing about...

not a weapon he has unleashed upon our democracy?

You could advocate for a ban on the personal ownership of bazookas...

without being labeled a liberal left lunatic?

Marching in the street was considered patriotic protest...

and assaulting law enforcement officers was an unpardonable crime?

We stood for defending democracy around the world...

and stood up to dictators who wanted to rule the world?

Regardless of our own politics...

we expected our political leaders to at least be decent human beings?

A Republican Senator could talk to a Democratic Senator...

without being labeled a traitor by their President?

The role of the military was to defend the U.S. against foreign aggression...

not to wage war on American cities whose citizens had not voted for Trump?

The U.S. Supreme Court was an independent judicial body...

not a rubber stamp for MAGA's war on our democracy?

Medical decisions were made by doctors and scientific researchers...

not by conspiracy theorists and political zealots?

The GOP was the **Grand Old Party** of Honest Abe Lincoln...

not the **gutless obsequious puppets** of pathological liar Donald Trump?

We were the United States of America...

not the Untied States of America?

We were the Red White and Blue...

not the Red against the Blue?

We don't need to Make America Great Again...

we need to Make America Whole Again.
